<http://www.joakimengstrom.com>

*My name is Joakim Engström, I was born 1987 and is currently living in Sweden's capital Stockholm.*

*Steve Jobs gets teased for calling everything magical and revolutionary, but in many regards he was right about the first iPhone.*

*I've been working as an Android and iOS developer since 2011, my main fuel for learning have always been my burning interesting in technology and my creative side, I love creating something you can interact with on a screen. I love to write beautiful code, but also to experiment and hack things together as fast as possible, hopefully writing somewhat beautiful code while doing it.*

*You can constantly see me at local meetups, I also try to go to as many hackathons and conferences as I can.*

*When I'm not writing code, you can see me at the cinemas watching a too long, oscar-nominated, hard sci-fi film in which the characters randomly break out in song. I also have a bunch of podcasts about various topics I'm listening to whenever I can. Sometimes you can also see me practicing running for a race or marathon which I've been dumb enough to sign up to.*

## Experience

### iZettle

02 / 2013 - Present

*Android Developer*

I'm working on the iZettle android application. The app is really expansive and covers many features that is needed for a merchant.

I'm one of the developers that has been working longest on the app and the work has included:

- Major refactoring
- Major UI overhaul, including material design implementation
- Constant communication with the backend
- Many custom elements and views
- Caching in the app
- Implementation of android specific features such as AccountManager and

ContentProvider

- Making the app gradle compatible

## Guidepal.com

03 / 2012 - 02 / 2013

*iOS Developer*

I mostly did iOS development for GuidePal's iPhone and iPad application. My work also included Android UI advisor and communication with external companies about Guidepals business.

The app consists of several travel guides inside one app and each guide consists of:

- Offline maps and online maps
- Offline and online content including pictures
- Augmented reality view
- Notifications

## Ackebrink

08 / 2011 - 04 / 2012

*Consultant*

I held these courses:

- Two courses on Mobile and Web Interfaces
- One courses on HTML, CSS and javascript for smartphones
- Two courses on Android SDK development

## ITMaskinen

01 / 2011 - 06 / 2011

*Intern*

Worked as an intern and, among other things, developed a big social event android application together with co-workers.

I also got more experience about developing a big mobile application from scratch.

### Languages

- English
- Swedish

### Skills

- Android studio
- Objective-C
- Android Development
- Java
- iOS development
- jQuery
- Android SDK
- Mobile Interfaces
- Android
- Mobile Applications
- Xcode
- iOS

- Git
- Github
- MVC
- Mobile Devices

#### *Education*

### **Nackademin yrkeshögskola**

2009 - 2011

*Yrkerhögskoleexamen , Mobile Communications and Development*
